

Nanotech-Nanotox of Soft Nanosystems

This workshop is organized in the framework of a Marie Curie ITN network NANOS3 "Soft Small and Smart: Design, Assembly, Dynamics of Novel Nanoparticles for Industrial Applications" <http://nanos3.eu/>

It will be held at Institut de Chimie et des Matériaux Paris Est, 2 rue H. Dunant, 94320 Thiais, France <http://www.icmpe.cnrs.fr/>

The meeting will cover research topics related to soft matter nanoscience with special focus on applications in health science and in materials endowed with specific mechanic/adhesion/friction properties. A special session will also be dedicated to the toxicology aspects of these nanosystems. It is opened to PhD students, post-doctoral fellows and senior scientists.

It will consist of 4 sessions over 2 days and will include invited lectures by leading scientists as well a poster session which will provide opportunities of exchange with scientists of different fields.

Registration deadline May 11 2015
amiel@icmpe.cnrs.fr

Comittee:

Catherine Amiel, Wuge Briscoe, Imre Vargas

Confirmed speakers

Charlotte Beddoes (University of Bristol)

Jorge Boczkowski (Université Paris Est Créteil)

Oleg Borisov (Université de Pau)

Cédric Boissière (UPMC, Paris)

Kenneth Dawson (University College Dublin)

Karin Edler (University of Bath)

Ruxandra Gref (University Paris-Sud)

Niko Hildebrandt (Université Paris-Sud)

Dominique Hourdet (ESPCI, Paris)

Alain Jonas (University of Louvain)

Jacob Klein (Weizmann Institute)

Erin Koos (Karlsruhe Institute of Technology)

Shlomo Magdassi (Hebrew University of Jerusalem)

Debashish Mukherji (MPI Mainz)

Erwan Nicol (Université du Maine)

Francesca Ravera (CNR-IEI, Genova)

Frederic Restagno (University Paris-Sud)

Margaret Saunders (University of Bristol)
